About Me

I am a BSc (Hons) Computer Science undergraduate at NSBM Green University with a strong interest in software engineering and full-stack web development. I have hands-on experience building web applications using React.js, Node.js, MongoDB, HTML, CSS, and JavaScript through academic and team-based projects, and I am increasingly drawn to DevOps and automation, exploring how modern software and AI-assisted development tools can help streamline workflows and solve real-world problems in industry settings. I regularly take part in hackathons to sharpen my technical and problem-solving skills, and currently serve as Volunteer Co-Lead of Hackathon Hub at NSBM, where I help organize technology-focused events while continuing to learn modern development practices.

Skills and Technologies

Frontend Development: React.js, JavaScript, Vite, HTML, CSS, Responsive Web Design

Backend Development: Node.js, REST APIs

Database Technologies: MongoDB, MySQL

UI/UX Design: Figma, Wireframing, Prototyping, User Research, Design Systems

Tools: Git, GitHub, VS Code

Programming Languages: JavaScript, Java, Python, C

Professional Skills: Problem Solving, Prompt Engineering, Adaptability, Rapid Learning

Education

NSBM Green University 2024 – Present

Bachelor of Science (Hons) in Computer Science

- **Current GPA:** 3.31 / 4.0

- **Relevant Coursework:** Data Structures and Algorithms, Database Systems, Software Engineering, Web Development, Human Computer Interaction, Operating Systems, System Fundamentals, Development of Enterprise Applications, Software Architecture, System Analytics and design, Computer Networks, Object Oriented Programming with Java

G.C.E. Advanced Level Examination (Technology Stream) 2021

- **Results:** C, C, C

G.C.E. Ordinary Level Examination 2018

- **Results:** 2A, 5B, 1C, 1S

Projects

Karthik Portfolio — Personal Portfolio Website Personal Project | 2026

Tech Stack: React.js, Vite, JavaScript, CSS

Live Site: iamkarthik.me | **Repository:** github.com/s-karthik-1/karthik-portfolio

- Designed and developed a responsive, component-based personal portfolio website using React and Vite, with reusable UI elements for maintainability.
- Deployed and hosted the site independently, making it publicly accessible as a live, recruiter-facing portfolio.

Stone Age — Online Food Ordering System Group Project | 2025

Tech Stack: React.js, Node.js, MongoDB

Repository: github.com/RISKY-MAM/SF-Project-Stone-Age

- Developed responsive frontend interfaces using React.js for menu browsing, cart management, and order placement.
- Built reusable React components and integrated frontend functionality with backend APIs.

- Collaborated with team members using Git and GitHub throughout the development lifecycle.

D&D Fashions — E-Commerce Web Application

Group Project | 2024

Tech Stack: HTML, CSS, JavaScript, MySQL

Repository: github.com/Laseyaa/Clothing-Website

- Contributed to planning the application architecture and selecting technologies for development.
- Assisted in designing the website structure, user interface, and navigation flow.
- Participated in implementation, testing, and team collaboration activities.

E-Commerce Website Redesign — UI/UX Case Study

Group Project | HCI
Module | 2025

Tech Stack: Figma, Wireframing, Prototyping

Prototype: View Interactive Figma Prototype

- Designed wireframes and high-fidelity user interfaces using Figma.
- Created interactive prototypes to improve usability and user navigation.
- Applied user-centred design and HCI principles throughout the redesign process.

Core Strengths

Frontend Development: Experience building responsive and interactive web applications using React.js and JavaScript.

UI/UX Design: Creating wireframes, prototypes, and user-centred designs using Figma.

Team Collaboration: Experience working in group projects using Git and GitHub version control.

Continuous Learning: Passionate about modern web technologies and software engineering best practices.

Leadership & Professional Development

Volunteer Co-Lead — Hackathon Hub, NSBM Green University

- Co-lead the planning and organization of hackathons, coding competitions, and technology-focused events that encourage innovation and technical skill development among students.
- Collaborate with committee members to plan, coordinate, and execute student-led initiatives, strengthening leadership, teamwork, and project management skills.
- Actively participate in university and community hackathons, gaining hands-on experience in rapid prototyping, problem-solving, and collaborative software development.
- Continuously explore emerging technologies, modern development practices, and real-world software solutions through hackathons and self-directed learning.

Co-Chairperson — NeuroX 1.0, Hackathon Hub NSBM

- Co-chaired NeuroX 1.0, a hackathon organized by Hackathon Hub NSBM, sharing responsibility for event planning and overall execution alongside fellow committee members.
- Coordinated logistics and team communication under tight timelines, helping the event run smoothly from planning through delivery.

Job Skills Development Training Program — Bank of Ceylon, Old Moor Street Branch

- Gained experience working in a professional organizational environment, strengthening communication, teamwork, and professional responsibility.
- Developed an understanding of structured workflows, task management, and collaboration within a professional workplace setting.
